

Press release

Sopra Steria and SkyReal announce the launch of a partnership for the deployment of virtual reality for industry

Paris, 5 April 2023 – Sopra Steria, one of Europe's leading tech companies, recognised for its consulting, digital services and software publishing activities, has announced the launch of a partnership with SkyReal, a French company specialising in the design of virtual reality solutions. This strategic partnership is consistent with the deployment of innovative virtual reality solutions for the transformation of industrial sectors.

As a major player in the digital transformation of businesses, Sopra Steria is committed to supporting changes in the industrial sector by providing secure, optimised and innovative solutions. The use of virtual reality in the strategic aeronautics, aerospace, defence and energy sectors helps accelerate and optimise the design of new projects, through a "right the first time" approach.

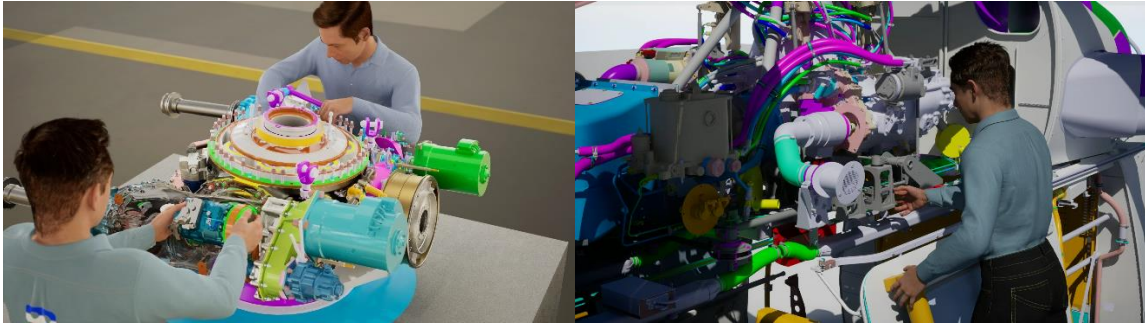

As part of the development of its range of virtual reality solutions for industrial use, Sopra Steria has announced it has taken a stake in SkyReal, a company specialising in the design of turnkey virtual reality tools. As an expert in virtual reality, SkyReal relies on technological innovation - in particular 3D - to design immersive tools for industrial use. With the implementation of this partnership, the solutions developed will help engineers plan their projects through the digitisation of the design process and data visualisation.

The range of solutions provided by SkyReal contributes to creating a genuine industrial metaverse. Based on real-time 3D technologies and MBSE (Model Based Systems Engineering) approaches, SkyReal develops complex data visualisation solutions for modern engineering. SkyReal facilitates the deployment and integration of 3D/VR (Virtual Reality) tools in industries throughout the design cycle, based also on leading software Unreal Engine, the 5th version of which is revolutionising computational performance.

The SkyReal VR solution has become a benchmark offering that sets new standards for virtual reality in industry. It is modular in design and its features adapt to business needs via a system of plugins.

"This collaboration with SkyReal aims to provide businesses with new, secure immersive virtual reality solutions. The purpose of these solutions dedicated to project design is to support the strategic transformation of industrial players as their businesses develop", points out **Josselin Demessine, Head of Engineering Business Line at Sopra Steria.**

"This partnership with Sopra Steria marks a new stage in SkyReal's growth. This collaboration will allow us to offer a complete range of services based on SkyReal technologies while managing change and digital transformation for our customers", explains **Hugo Falgarone, Managing Director of SkyReal.**

About Sopra Steria

Sopra Steria, a European tech leader recognised for its consulting, digital services and software development, helps its clients drive their digital transformation to obtain tangible and sustainable benefits. It provides end-to-end solutions to make large companies and organisations more competitive by combining in-depth knowledge of a wide range of business sectors and innovative technologies with a fully collaborative approach. Sopra Steria places people at the heart of everything it does and is committed to putting digital to work for its clients in order to build a positive future for all. With 50,000 employees in nearly 30 countries, the Group generated revenue of €5.1 billion in 2022.

The world is how we shape it.

Sopra Steria (SOP) is listed on Euronext Paris (Compartment A) – ISIN: FR0000050809

À propos de SkyReal

SkyReal publishes immersive 3D software for industries that design innovative products. These new work tools bring immersive technologies from the world of video games into a professional context and offer new perspectives of collaboration and visualization; in other words, it is a metaverse for engineers that SkyReal makes available to the largest industrial companies (Airbus, ArianeGroup, Naval Group, Safran...).
