Sopra Group takes part in the Mobile IT Expo in Paris from 16 to 17 October

10 October 2013 – Sopra Group, a major European consulting, technological services and software development company, created its 'IT Mobility Excellence Division' in 2012 in a bid to develop its mobility range. Pierre ZALDIVAR, the head of the division, will be at the 'Mobile IT Expo' to welcome visitors to the Sopra Group stand.

Mobility is a strategic development area for Sopra Group, which aims to become a major, recognised player in this fast-growing market. To that end, the Group is actively developing its 'Mobile Experience' range.

The range covers all of the services necessary to successfully manage companies' mobility projects: from defining strategic and technological approaches, to distributing and maintaining applications within stores, while also focusing on development (uses, specific features, design, ergonomics, development, testing and commissioning) and switchover support.

In order to address its customers' different needs, Sopra Group's range is split into a number of distinct modules, such as 'Mobile Testing' and MDK Movalys (Mobile Development Kit), which makes it possible to manufacture and develop multiplatform mobile solutions.

The 'Mobile IT Expo', a tradeshow for mobility solutions and mobile applications, will take place at the Porte de Versailles in Paris from 16 to 17 October.

About Sopra Group
