

## Sopra Group, the 2<sup>nd</sup> most successful software vendor in France.

**Paris, 21 May 2013 – On the occasion of the 2013 publication of the *Truffle 100* rankings, which rates software vendors in France, Sopra Group (NYSE Euronext: SOP) was ranked in 2<sup>nd</sup> position, gaining one place compared to last year.**

Since its creation, Sopra Group has placed the role of software vendor at the heart of its development. The most recent edition of the *Truffle 100* confirms the success of this strategy, naming Sopra Group the 2<sup>nd</sup> most successful software vendor in France.

Solutions produced by Sopra Group, all of which are market-leading solutions within their respective markets, are aimed at three business sectors:

- Financial Services, with a software suite used by more than 500 clients in 70 countries;
- Human Resources, with a range of solutions covering all IT-related HR requirements;
- Real Estate, with solutions that now manage almost 50% of social housing and 70% of the commercial centres in France.

In April 2013, Sopra Group strengthened its position as a software vendor through the acquisition of HR Access, a developer specialising in the human resources management market.

All of the Group's development activities provide jobs for almost 2,500 employees, of whom 1,000 are involved with innovation-related and research & development tasks on a daily basis. All products are developed in close collaboration with clients.

Pierre Pasquier, President of Sopra Group, stated: "*We are delighted with the 2013 ranking, which reiterates that Sopra Group is a major player in the area of software development in France. Software is one of the key components concerning the development and the performance of our Group, and we will continue to develop our strong position within this innovative and value-adding sector.*"
