Sopra Steria recognized as a Public Cloud Services Leader in France by ISG for the second consecutive year

Paris, 06 December 2021 - Sopra Steria, a European leader in consulting, digital services, and software publishing, announces that its Public Cloud Transformation and Management services have been ranked among the "Leaders" in France as part of the latest ISG Provider Lens report dedicated to Public Cloud Services and Solutions 2021.

Chosen by enterprises and organizations of all sizes, Public Cloud is a key enabler of Digital Transformation. In the era of Cloud-native technologies, companies and organizations need more than ever to make the most of these technologies to transform their business activities, make their business processes more flexible and increase their teams’ productivity.

This adoption is giving rise to numerous projects to adapt practices, tools, skills, and culture to the Public Cloud. Sopra Steria has designed a comprehensive portfolio of solutions and services to support the adoption of Cloud technologies through a holistic seven-dimensional transformation approach: strategy and governance, change management, technology, business models and processes, economics, security, and sustainability.

Evaluating the leading providers of public cloud transformation and management services in France, ISG's Provider Lens 2021 report praises Sopra Steria Cloud Services' ability to accompany transformation, facilitate integration and support operations throughout the lifecycle.

"Sopra Steria offers a complete public cloud transformation and management service with a cloud-native first dimension. Sopra Steria's teams, combining both infrastructure and application skills, guide companies in selecting the most relevant Cloud solutions for their needs in terms of scalability, innovation, and security. These capabilities and services are offered in a broad multi-cloud context - AWS, Google Cloud, Microsoft, IBM Cloud, Oracle Cloud or OVHcloud - offering a wide range of choices," said Pedro Bicudo Maschio, Distinguished Analyst and Author at ISG.

"Digital services create value for companies but also raise considerable transformation challenges. Sopra Steria Cloud Center of Excellence Teams accelerate these transformations through industrialized and automated Cloud services and platforms. Already recognized by several Managed Service Provider initiatives, we are delighted that these services, which are a source of flexibility, resilience, and innovation, have been identified as one of the leaders among public Cloud services and solutions” added Béatrice Rollet, Director of Cloud & Digital Services at Sopra Steria.

About ISG Provider Lens™ Research
ISG Provider Lens™ is a practitioner-led service provider comparison, empowered by ISG’s well-known advisory expertise and their data-driven research team. ISG Provider Lens™ research reports provide independent vendor evaluations and enterprise buying behavior segmentation. Service provider data, from either primary or secondary research, will translate into two different outputs. They are categorized as:

- ISG Provider Lens quadrant reports: ISG compares and positions service providers in a graphic presentation based on their service portfolio strength and market competitiveness. Based on their relative positioning, service providers are identified as leaders, challengers or contenders. These studies are conducted over multiple regions and for multiple service line topics, in the IT, BPO and industry-specific domains.
- ISG Provider Lens archetype reports: ISG segments the prevalent enterprise buying behaviors for various domains or service lines. These buying behaviors or archetypes generally represent different enterprise preferences based on their maturity journey. These studies also highlight unique service providers best suited to serve each of these archetypes. The archetype studies are conducted at a global level.
