Summary

- 01 The gap between the offer of digital public services and expectations should be narrowed – **page 6**
- 02 To fulfil the strong need of simplification, user-friendly online procedures are the key expectation – **page 12**
- 03 The capacity to have a close relationship with public agents and the protection of their personal data are key elements needed by EU citizens – **page 18**

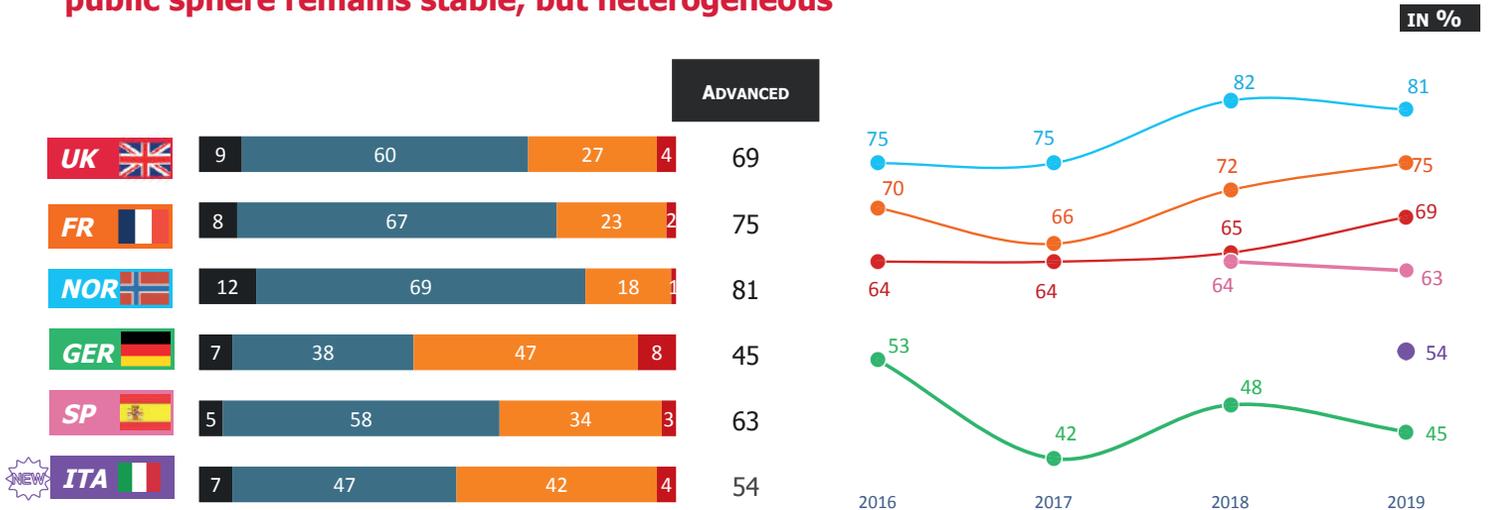

01

The gap between the offer of digital public services and expectations should be narrowed

EU citizens' opinion on the degree of digital development in the public sphere remains stable, but heterogeneous

Question: How would you describe the current degree of digital development – e.g. use of Internet and digital services – in the Government (*national, local, social security or devolved administrations*) and its services?

Depending on which digital service is evaluated, the level of satisfaction differs

UK 

FR 

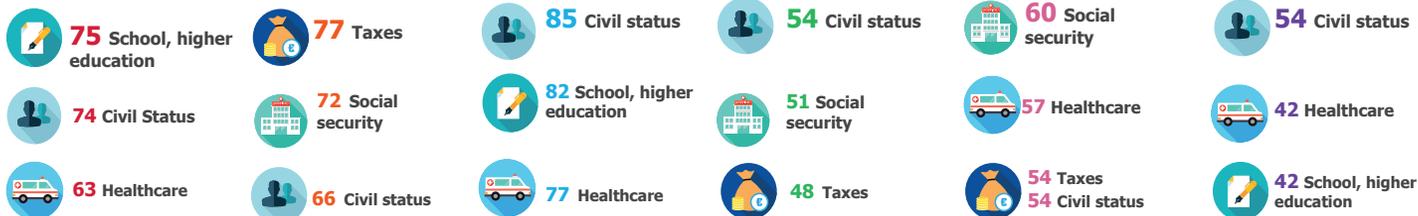

NOR 

GER 

SP 

ITA 

TOP 3 - SUBTOTAL SATISFIED IN % - TO RESPONDENTS ONLY

TOP 3 - PRIORITY IN %

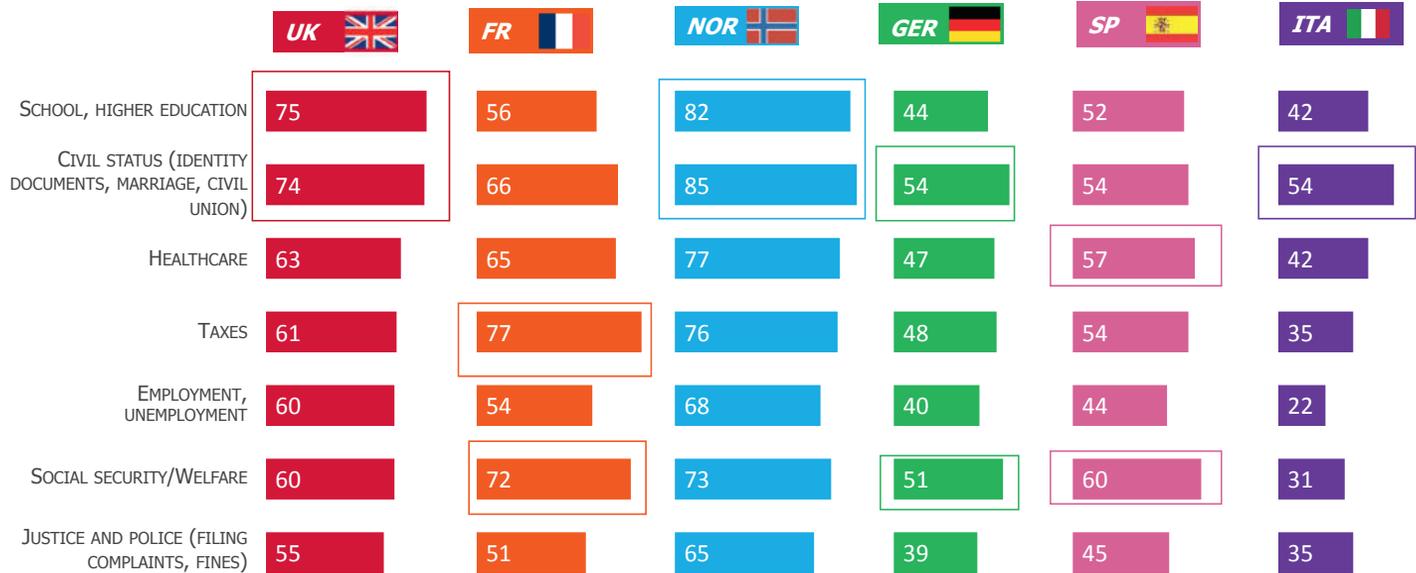

Question: In each of the following areas, are you satisfied with the digital services provided by the State and its agencies?

Question: And in your opinion, which areas of the public sectors should make the digital development – i.e. use of the Internet and digital services – a **priority**?

The most satisfying areas in terms of digital public services

SUBTOTAL SATISFIED IN %
TO RESPONDENTS ONLY (E.G. PEOPLE WHO HAD TO USE A SERVICE IN THIS AREA)

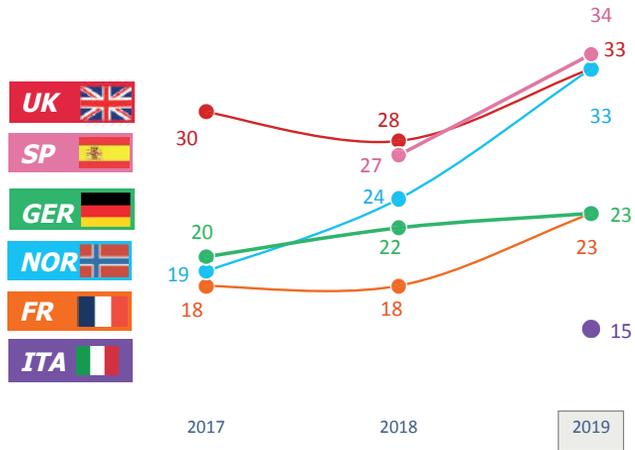

Question: In each of the following areas, are you satisfied with the digital services provided by the State and its agencies?

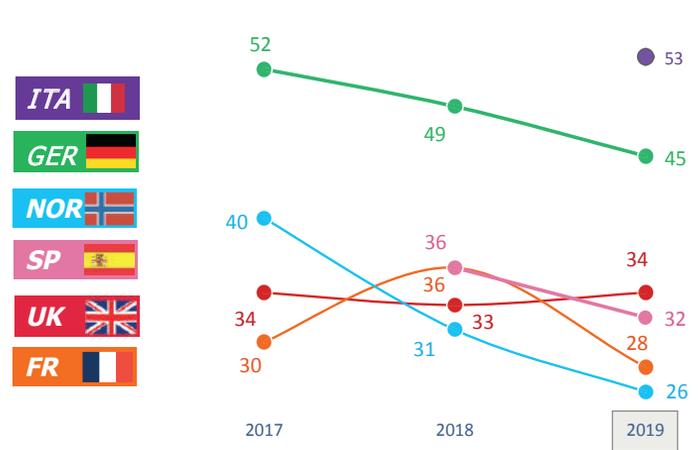

The gap in the digitalisation of the public sector compared to private companies is narrowing as private digital services tend to be the standard

SUBTOTAL ADVANCED, IN %

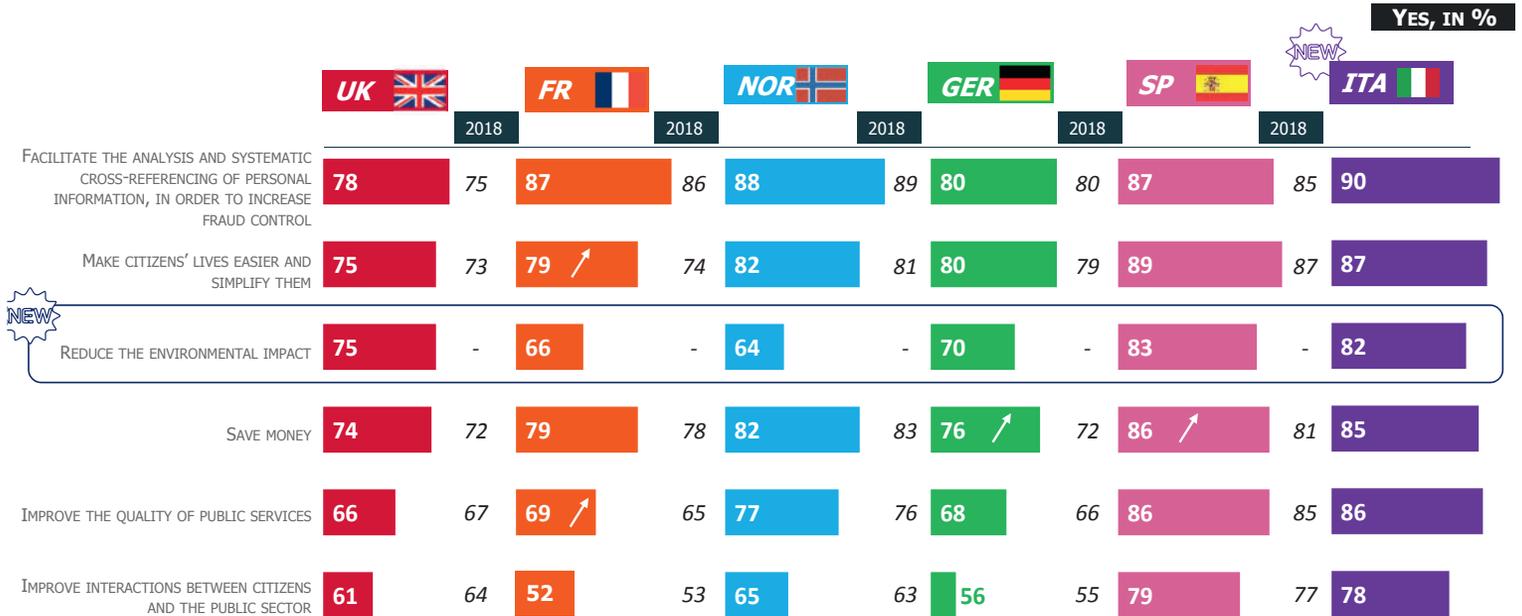

SUBTOTAL BEHIND, IN %

Question: In your opinion, compared to digital services offered by private companies, digital services offered by the public sector in [your country] are...

Digitalization of public services is also seen as a way to address environmental issues

Question: Do you think that the development of digital public services will...

02

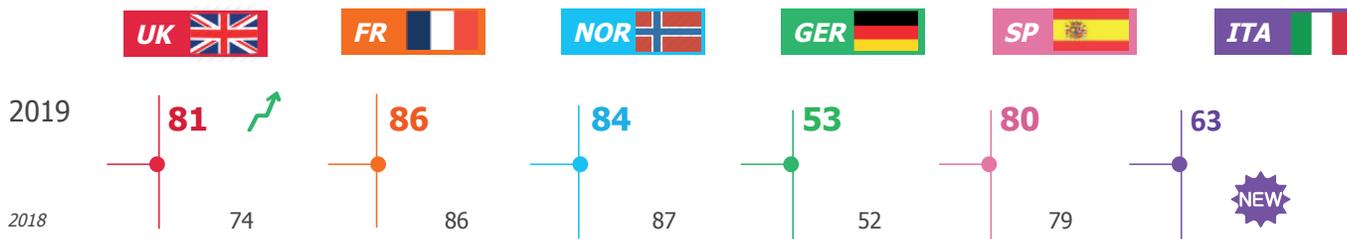

To fulfil the strong need of simplification, user-friendly online procedures are the key expectation

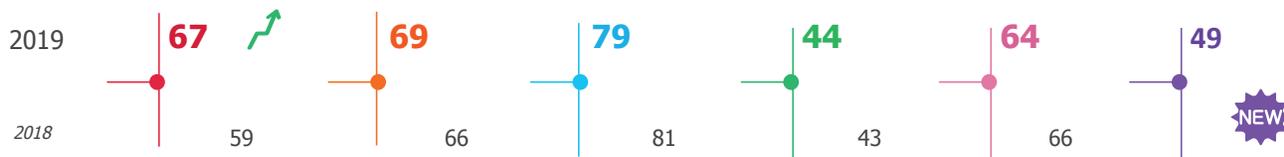

First and foremost, the gap between the number of digital public services and their user-friendliness is still notable

SUBTOTAL YES IN %

THE PUBLIC SECTOR HAS INCREASED THE NUMBER OF DIGITAL PUBLIC SERVICES

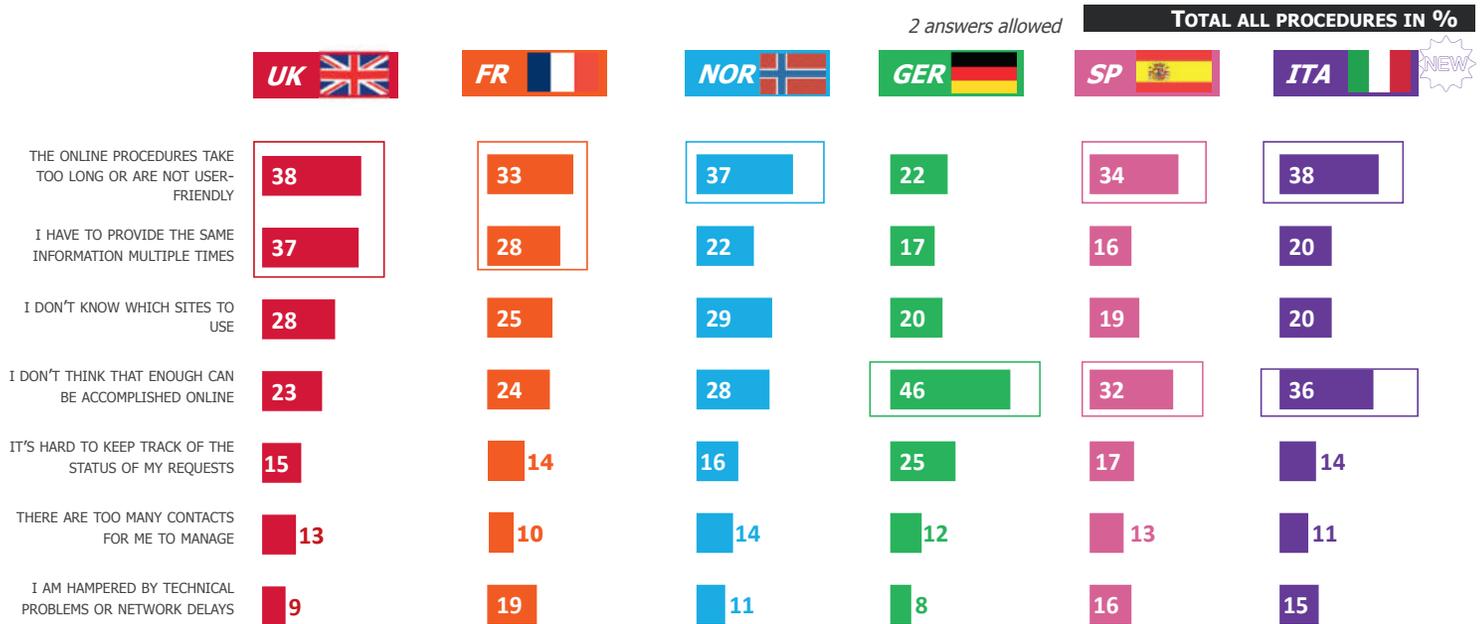

THE DIGITAL TOOLS AND SERVICES MADE AVAILABLE BY THE PUBLIC SECTOR ARE INCREASINGLY EASY TO USE

Question: Would you say that, in recent years... [the public sector has increased the number of digital public services/the digital tools and services made available by the public sector are increasingly easy to use] ?

In countries with a satisfying level of digitalisation, citizens need simplified procedures while less advanced countries also need more services

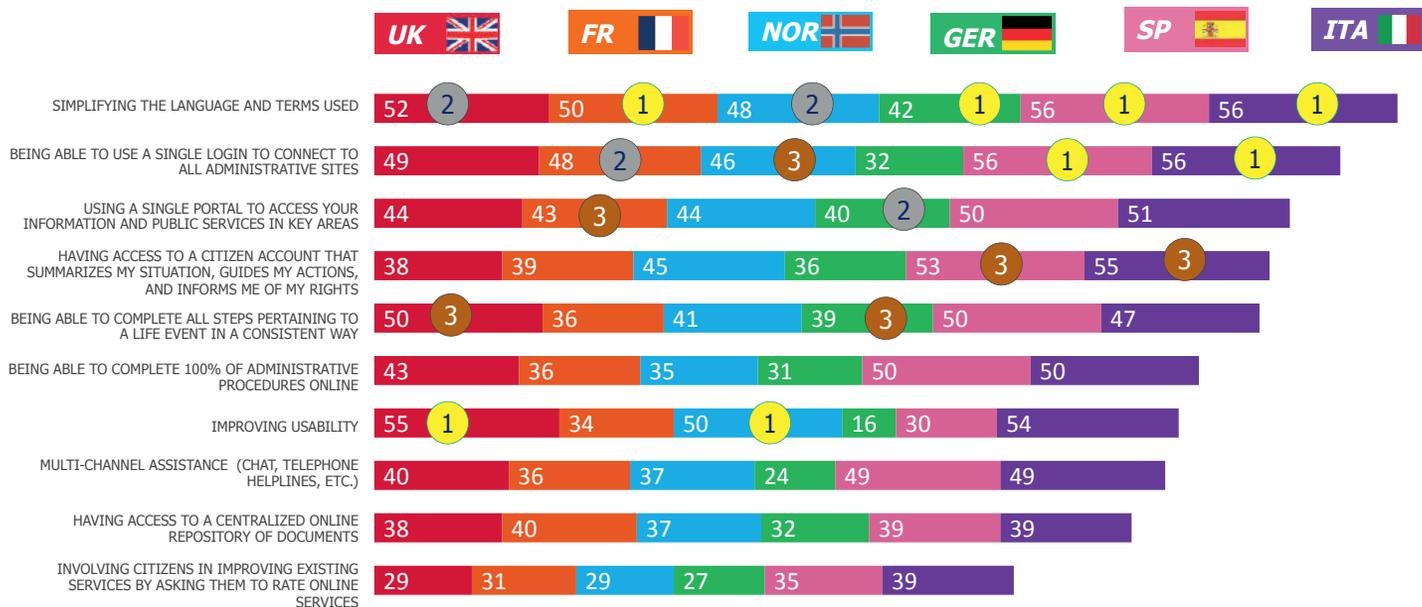

Question: Why should these online procedures be simplified?
 *2 items were deleted compared to 2018 (3 answers were allowed)

Simplified procedures imply many different changes; mainly a simplification of language, a single login, and a single portal

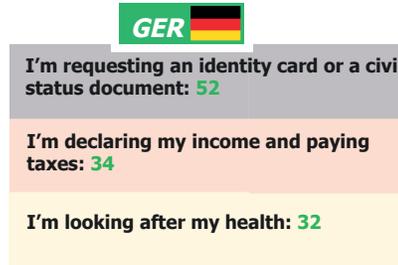

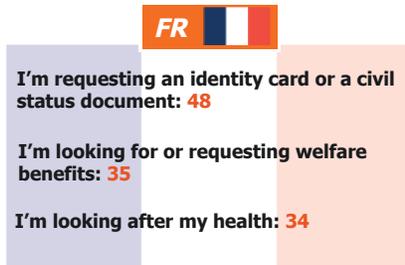

YES, ABSOLUTELY - IN %

Question: Do you think that the following changes would help simplify your online procedures?

More specifically, online procedures linked to health, taxes and civil status need to be simplified as a priority

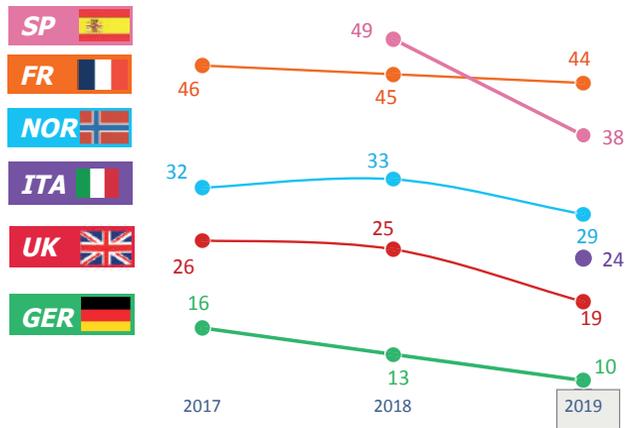

Question: And which online procedures linked to these life events do you think need to be simplified as a priority?

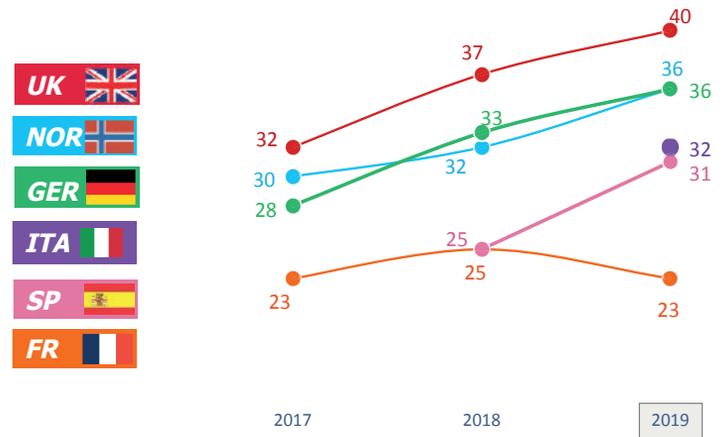

Except in France, EU citizens feel less confident about the government's will to make a difference

WILL MANAGE TO DO SO, IN %

DOES NOT REALLY HAVE THE WILL TO MAKE PROGRESS, IN %

Question: And concerning the development of digital public services, do you feel that the Government...

03

The capacity to have a close relationship with public agents and the protection of their personal data are key elements needed by EU citizens

Digital inclusion remains a strong concern for EU citizens

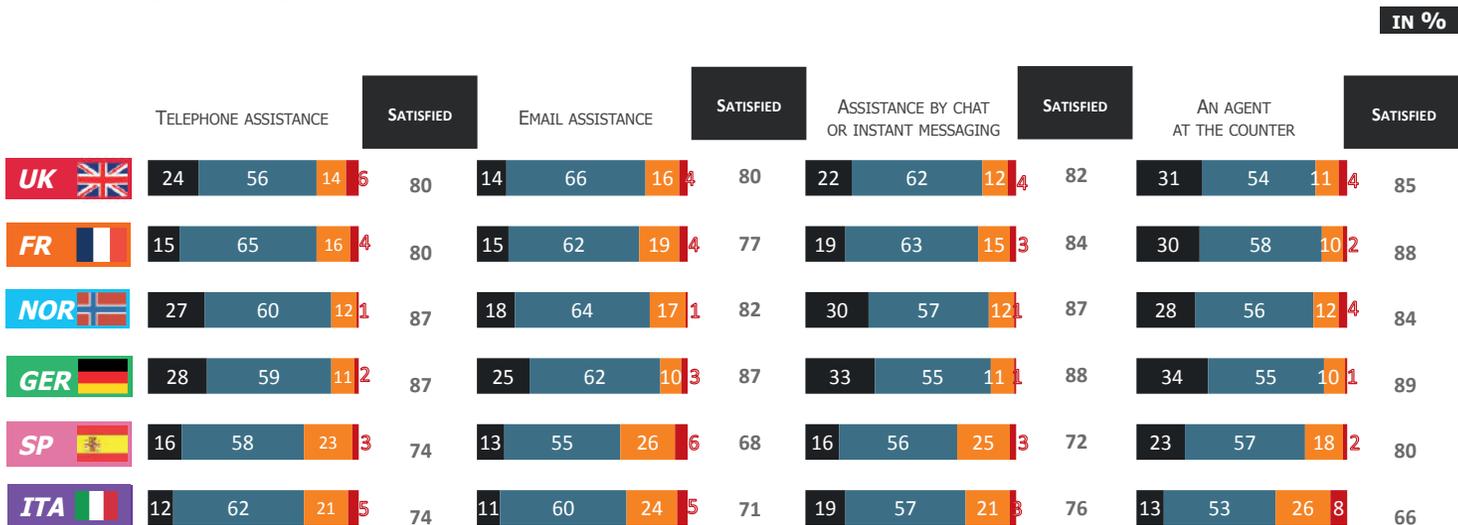

**(people who are not comfortable with digital technology or language issues, people without access to digital technology, etc.)*

Question: Do you think that the development of digital public services will...

As they're provided with high quality of assistance, EU citizens are indifferent of the channel

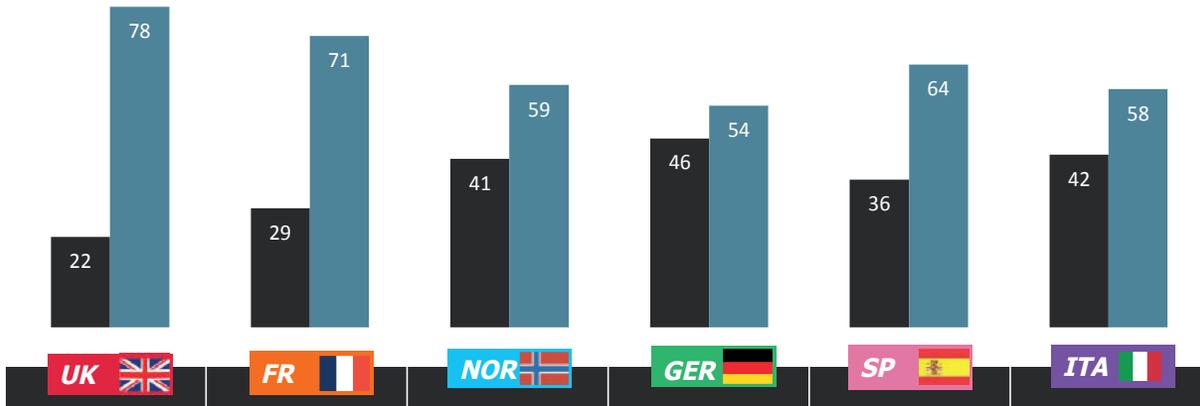

Question: Were you satisfied with the support provided by the following means? *To those who requested this type of assistance*

If they had to choose, citizens would rather stay closer to home and get help from a general-purpose agent than travel farther to meet someone specialised

IN %

**TO GET HELP FROM A HIGHLY SPECIALIZED AGENT,
EVEN IF IT MEANS TRAVELLING FARTHER**

**TO STAY CLOSER TO HOME, EVEN IF IT MEANS GETTING HELP
FROM A GENERAL-PURPOSE AGENT**

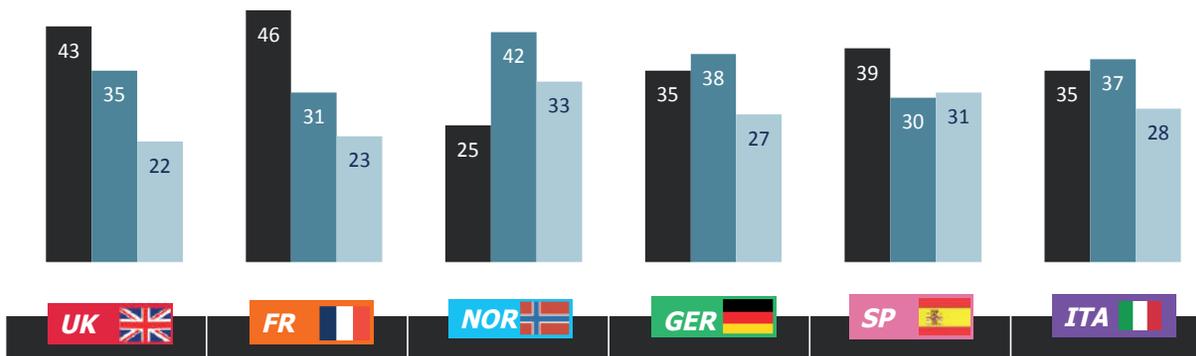

Question: To access public services, do you generally prefer...

In each country the use of digital terminal is seen in a different way

IN %

PROVIDING ACCESS TO ONLINE SERVICES FOR PEOPLE WHO ARE UNABLE TO DO SO FROM HOME

OFFERING THE BENEFIT OF ASSISTANCE IN CASE OF DIFFICULTIES IN COMPLETING THE ONLINE PROCEDURE

TRAINING THE LEAST COMFORTABLE USERS IN ORDER TO EMPOWER THEM TO COMPLETE ONLINE PROCEDURES THEMSELVES

NEW **Question :** In addition to agents and counters, the Administrations are developing multiservice facilities equipped with digital terminals or computers to complete a number of online procedures. In your opinion, which need should these digital terminals or computers prioritise?

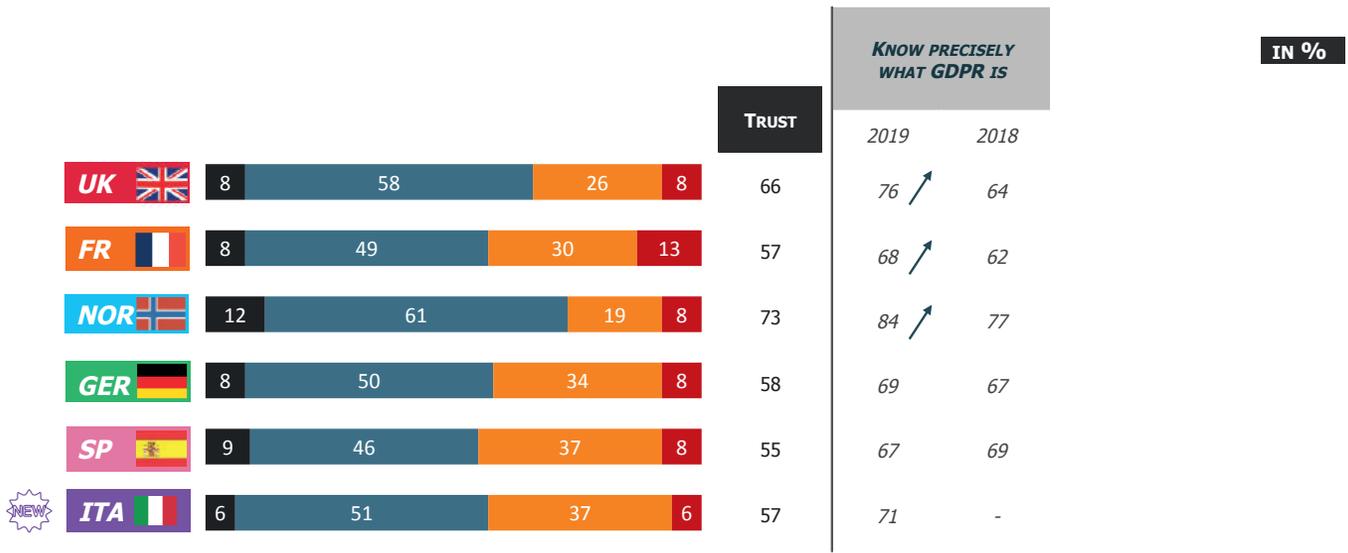

Citizens raise concern on the protection of their data and lack of assistance

Question: With respect to digital public services, do you agree or disagree with the following statements?

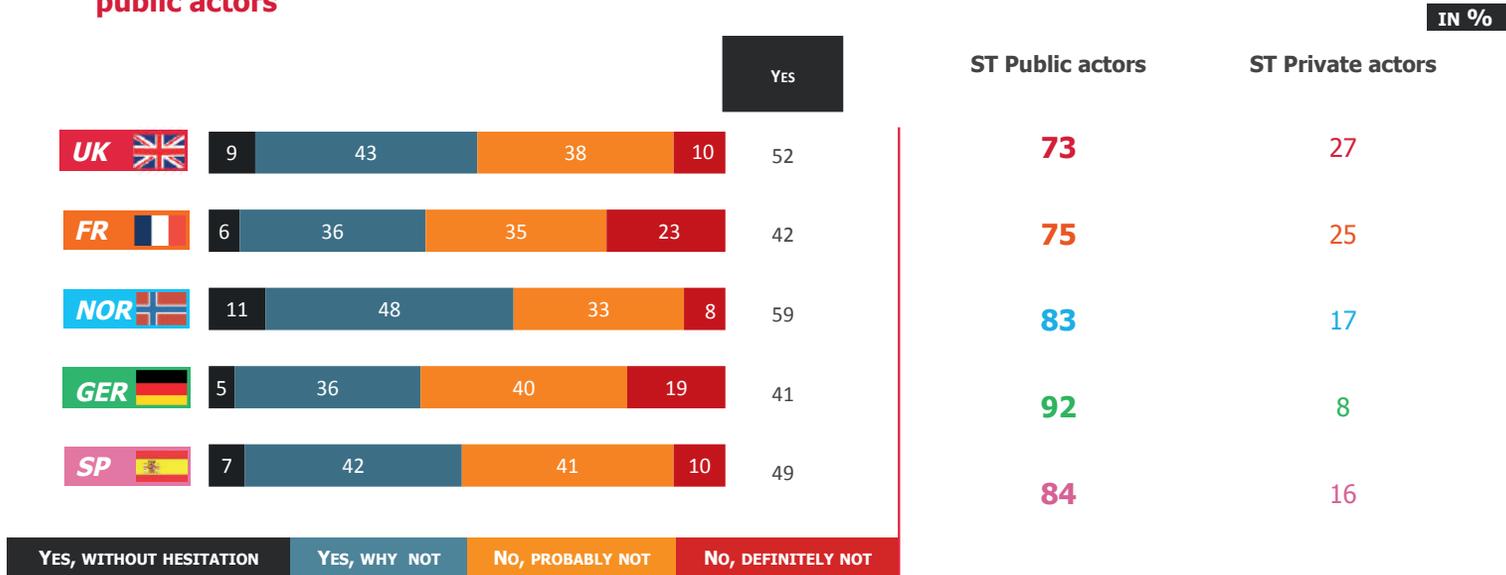

In EU citizens' opinion the GDPR still strengthens public trust

Question: How much do you trust the public sector to ensure the security of the digital data in their possession and particularly your own confidential information?

Only about half of the respondents would be willing to store their personal data on a single digital platform to make online identification easier; a platform that should rather be run by public actors

Question: Would you be willing to store your personal identity as well as further data (e.g. payment information) on a single digital platform in order to make online identification easier?

Question : Who on your opinion should run such platform?
